

Hello Readers,

I am Nipun Porwal, I did my B.Tech in Geo Informatics from University of Petroleum and Energy Studies, Dehradun in 2014, after that I joined TCS and worked as Oil and Gas Data Analyst cum QA for 3 years for US based client Halliburton. In 2017 I joined Healing Hands a D2C brand as an IT Business Analyst; I headed a team of designers, developers and testers to develop web and mobile application as per the requirements of stakeholders and currently serving as a Sr. Business Analyst in Binmile Technologies. I have 7 years of Professional Experience working with different organizations out of which 4 years as a BA.

Being a student of geo-informatics I am passionate to explore new geographies, I love travelling and in India I found Kerala as most beautiful place it is truly a god's own country however during my graduation I did internship in CSIR lab in GOA which was a lifetime experience. I also love cooking, experimenting and create new flavor of sauces and salad dressings

I love interacting with people which make my job bit easier because major role of my job is to interact with clients understand their problems their pain points in business and provide solution to make their life easy and grow business exponentially.

I have chosen this program to upgrade my skills. In IT industry up skilling plays vital role and in current scenario business analysis role needs knowledge of tools like sql, power bi, tableau etc. to analyze the data of client and provide consultation. Currently data analysis is one of the most sought for skills in industry; organizations from all domains want to analyze the data to understand the behavior of their consumers.
